

Adham Mohamed

ml_engineering | 2.0 years

About Me

Junior Machine Learning Engineer with 2+ years of experience in developing and deploying ML models using Python, TensorFlow, PyTorch, and Hugging Face Transformers. Skilled in MLOps, cloud services (AWS), and containerization. Strong foundation in deep learning and natural language processing, complemented by practical contributions to open-source projects. Passionate about applying machine learning to solve real-world problems in healthcare and transportation.

Career History

Junior Machine Learning Engineer — Instabug

2023-09 to Present

Develop and maintain ML models for bug detection and categorization using Python, TensorFlow, and PyTorch. Built and deployed scalable inference pipelines on AWS SageMaker, reducing bug triage time by 30%. Collaborate with cross-functional teams to integrate ML features into Instabug's SDK, serving over 2 billion devices.

Machine Learning Intern — Vezeeta

2022-06 to 2023-08

Assisted in building a healthcare recommendation system using scikit-learn and NLP. Preprocessed large datasets of medical provider profiles. Implemented model evaluation and A/B testing frameworks. Contributed to data pipelines and documentation.

Research Assistant (AI Lab) — Zewail City of Science and Technology

2021-09 to 2022-06

Conducted research on deep learning for image segmentation under Prof. Tamer El-Din. Developed PyTorch models for medical image analysis, achieving 0.95 Dice score on a benchmark dataset. Co-authored a paper submitted to MICCAI 2022.

Data Science Intern — Fawry

2021-06 to 2021-08

Developed a customer segmentation model using K-means clustering on transaction data, improving marketing campaign ROI by 15%. Used Python, sklearn, and AWS Redshift.

Academic Background

Bachelor of Science, Artificial Intelligence — Zewail City of Science and Technology (2022-07)

Expertise

Python · C++ · TensorFlow · PyTorch · Hugging Face Transformers · scikit-learn · NLTK · SQL · Docker · AWS SageMaker · Git · Jupyter · MLflow · Pandas · NumPy · Agile Methodologies · Cross-functional Collaboration · Arabic (Native) · English (Fluent)

Credentials

TensorFlow Developer Certificate (Google)
AWS Certified Cloud Practitioner (Amazon Web Services)
Deep Learning Specialization (Coursera / deeplearning.ai)

Side Projects

OpenBB — Financial data platform for analysts, quants and AI agents.

keras — Deep Learning for humans

ML-For-Beginners — 12 weeks, 26 lessons, 52 quizzes, classic Machine Learning for all

free-programming-books-zh_CN — :books: 免费的计算机编程类中文书籍，欢迎投稿

| langchain — The agent engineering platform.
