## Executive Summary

---

Senior Fullstack Engineer with over 8 years of experience building scalable, high-performance web applications. Proficient in both frontend (React, TypeScript) and backend (Python, Node.js, Django, Flask) technologies, with a strong focus on modern full-stack frameworks and cloud infrastructure. An active open-source contributor and advocate for clean code and DevOps practices. Experienced in leading engineering teams and delivering end-to-end solutions in fast-paced environments.

## Leadership Experience

---

### Senior Fullstack Engineer

2022-01 – Present

*Instabug*

Led development of cross-platform web dashboards and internal tools for mobile SDK analytics. Designed and implemented RESTful and GraphQL APIs using Node.js and TypeScript. Mentored junior engineers and drove adoption of React, Next.js, and Docker in the frontend stack. Collaborated with DevOps to build CI/CD pipelines and deploy on AWS ECS.

### Fullstack Developer

2019-03 – 2021-12

*Vezeeta*

Built and maintained core features of the healthcare booking platform serving millions of users. Developed backend services in Python/Django and frontend components with React. Integrated payment gateways, real-time notifications, and third-party APIs. Optimized database queries and migrated legacy monolith to microservices.

### Associate Fullstack Engineer

2017-06 – 2019-02

*IBM Egypt*

Contributed to enterprise SaaS solutions for global clients. Developed REST APIs using Java Spring Boot and Angular frontends. Implemented automated testing and CI/CD pipelines with Jenkins. Participated in Agile ceremonies and on-call rotations.

### Junior Developer

2016-01 – 2017-05

*Fawry*

Developed payment gateway integration modules for e-commerce partners. Built merchant dashboards and reporting tools using PHP, MySQL, and JavaScript. Assisted in database schema design and performance tuning.
