Who I Am

Junior Game Developer with 2 years of experience in C++, C#, and Python, specializing in gameplay systems, entity component architectures, and AI navigation. Passionate about building performant and engaging games. Proficient with Unity, Godot, ECS frameworks, and modern C++ standards. Strong foundation in computer science from German University in Cairo combined with hands-on project contributions to industry-standard open-source tools like EnTT and RecastNavigation. Quick learner, effective team player, and dedicated to writing clean, maintainable code for interactive experiences.

My Journey

Junior Game Programmer (C++) @ Gameloft

2023-08 → Present

Developed core gameplay mechanics for mobile titles using C++ and proprietary engine. Implemented AI behaviors and pathfinding using RecastNavigation. Collaborated with designers and artists to integrate new features and optimize frame rate. Participated in code reviews and contributed to internal libraries.

Game Development Intern @ Instabug

2023-01 → 2023-07

Contributed to SDK features for mobile game developers, focusing on performance monitoring and bug reporting integration with Unity and Unreal. Built demo games to test and showcase SDK capabilities. Assisted in technical documentation and developer outreach.

Part-time Unity Developer @ Digital Hive

2022-06 → 2022-12

Developed 2D hyper-casual games from concept to release. Implemented game logic, UI, and monetization features. Worked with designers to iterate on gameplay based on analytics. Published multiple titles on Google Play Store.

Freelance Game Developer @ Self-Employed

2021-09 → 2022-05

Designed and coded small 2D platformers and puzzle games using Python (Pygame) and Godot. Created reusable components and learned game design fundamentals. Built a navigation mesh generator prototype using RecastNavigation.

Where I Studied

Bachelor of Science, Media Engineering and Technology

German University in Cairo (2023-06)

What I Work With

C++ C# Python Unity Godot Entity Component System (ECS) Recast Navigation Game AI
OpenGL SDL Git Agile/Scrum Problem Solving Communication

Things I've Built

recastnavigation

Industry-standard navigation-mesh toolset for games

QFramework

Godot/Unity3D System Design Architecture

GameDev-Resources

:video_game: :game_die: A wonderful list of Game Development resources.

entt

Gaming meets modern C++ - a fast and reliable entity component system (ECS) and much more

pygame

 pygame (the library) is a Free and Open Source python programming language library for making multimedia applications like games built on top of the excellent SDL library. C, Python, Native, OpenGL.

Credentials

- Unity Certified Associate: Game Developer — Unity Technologies (2022-09)
- AWS Certified Cloud Practitioner — Amazon Web Services (2023-03)
- Introduction to Game Development — Michigan State University (Coursera) (2021-12)
