SUMMARY

Results-driven Fullstack Developer with 5 years of experience building scalable web applications using modern frontend and backend technologies. Proficient in Python, TypeScript, and React ecosystems, with a strong track record of delivering fullstack solutions in high-growth Egyptian tech companies. Passionate about clean architecture, performance optimization, and mentoring junior developers. Active open-source contributor and continuous learner, currently exploring Blitz.js and Reflex for rapid fullstack development.

WORK EXPERIENCE

Senior Fullstack Developer

2023-07 — Present

Instabug (full-time)

Lead fullstack development of internal tools and customer-facing dashboards using Next.js, React, and Node.js. Architected microservices with Flask and FastAPI, integrating with AWS Lambda and PostgreSQL. Implemented CI/CD pipelines with GitHub Actions and Docker, reducing deployment time by 40%. Collaborated with product teams to launch bug tracking and performance monitoring features used by global clients.

Fullstack Developer

2022-03 — 2023-06

Swvl (full-time)

Developed and maintained the booking platform using React, Redux Toolkit, and Node.js. Built scalable APIs with Flask and PostgreSQL, handling 100k+ daily requests. Migrated legacy frontend to TypeScript, improving code maintainability. Worked in an agile team to ship ride scheduling features, increasing user retention by 15%.

Fullstack Developer

2020-09 — 2022-02

Vezeeta (full-time)

Built clinic management dashboards and patient portals with React and Flask. Integrated third-party services (SMS, payment gateways) and designed RESTful APIs. Implemented real-time notifications using WebSockets and Redis. Participated in code reviews and mentored two junior developers.

Junior Fullstack Developer

2019-09 — 2020-08

Fawry (full-time)

Assisted in developing payment portal modules using HTML, CSS, JavaScript, and Django. Created stored procedures and optimized SQL queries for reporting. Gained hands-on experience with version control, agile ceremonies, and test-driven development.

EDUCATION

Bachelor of Science in Computer Science

2019-06

Cairo University

SKILLS

Python, TypeScript, JavaScript, HTML, CSS, React, Next.js, Flask, Node.js, Blitz.js, Reflex, TanStack Router, PostgreSQL, MySQL, Redis, Docker, AWS, CI/CD, Git, REST APIs, Fullstack Development, Agile/Scrum

PROJECTS

freeCodeCamp (*TypeScript*)

freeCodeCamp.org's open-source codebase and curriculum. Learn math, programming, and computer science for free.

react (*JavaScript*)

The library for web and native user interfaces.

next.js (*JavaScript*)

The React Framework

react-native (*C++*)

A framework for building native applications using React
