Executive Summary

Motivated Junior Fullstack Developer with 2 years of experience crafting responsive, scalable web applications using Python, JavaScript, and TypeScript. Proficient in React, Django, and Node.js with a strong foundation in RESTful APIs and database design. Passionate about clean code, agile practices, and continuous learning. Eager to tackle complex challenges and contribute to high-impact teams.

Leadership Experience

Junior Fullstack Developer

2022-08 – 2023-04

Vezeeta

Built and maintained internal tools for healthcare booking platform. Developed React components and Node.js APIs, integrated third-party payment gateways, and optimized MongoDB queries to improve response times by 20%. Collaborated in daily stand-ups and sprint planning.

Junior Software Engineer

2023-05 – 2024-01

Instabug

Contributed to the frontend team building performance monitoring dashboards. Implemented TypeScript-typed React components with Redux state management. Participated in code reviews and set up CI/CD pipelines using GitHub Actions, reducing deployment errors.

Fullstack Developer

2024-02 – Present

Swvl

Fullstack feature development on the core transportation platform using Django REST Framework and React. Designed PostgreSQL schemas for route optimization, implemented Docker containerization for local development, and mentored interns on Python best practices.
