About Me

Mid-level Fullstack Developer with 5 years of experience building scalable web applications using Python, TypeScript, React, and Next.js. Passionate about clean code, performance optimization, and delivering user-centric solutions. Experienced in both Egyptian startups and international enterprise environments. Proven track record of taking projects from concept to production, leveraging modern frameworks and cloud services.

Education

Bachelor of Science in Computer Science in Computer Science

2017-06

Cairo University

Projects

freeCodeCamp (2026-05)

freeCodeCamp.org's open-source codebase and curriculum. Learn math, programming, and computer science for free.

Tech: TypeScript

react (2026-05)

The library for web and native user interfaces.

Tech: JavaScript

next.js (2026-05)

The React Framework

Tech: JavaScript

react-native (2026-05)

A framework for building native applications using React

Tech: C++

Internships / Experience

Fullstack Developer at Instabug (2022-01 – Present)

Developing and maintaining internal dashboards and monitoring tools using React and TypeScript. Building RESTful APIs with Python (Flask) and PostgreSQL. Implementing CI/CD pipelines with Jenkins and Docker, and

managing deployments on AWS. Collaborating with cross-functional teams to enhance product reliability and user experience.

Fullstack Developer at Vezeeta (2020-06 – 2021-12)

Worked on the patient-facing web application using Next.js and TypeScript. Built reusable UI components and integrated with backend services to support booking and telemedicine features. Optimized page performance and accessibility, resulting in a 30% improvement in load times. Participated in code reviews and sprint planning in an Agile environment.

Junior Fullstack Developer at Swvl (2018-08 – 2020-05)

Contributed to the development of the driver management portal using React and Node.js. Assisted in building backend microservices with Python (Flask) and MongoDB. Wrote unit and integration tests, and participated in migrating legacy systems to a microservices architecture. Gained hands-on experience with Docker and AWS deployment processes.

Software Engineer at IBM Egypt (2017-06 – 2018-07)

Started career as a software engineer in the cloud services division. Developed internal tools using Python and Flask for automation of reporting workflows. Collaborated with senior engineers on client projects, focusing on backend logic and database design with PostgreSQL. Learned agile practices and participated in daily stand-ups and retrospectives.

Certifications

AWS Certified Developer – Associate — Amazon Web Services (AWS)

Microsoft Certified: Azure Developer Associate — Microsoft
