

Profile

Seasoned software professional with deep expertise in Ruby, Python, and C#. 5 years of experience delivering mission-critical systems.

Experience

Platform Engineer 2023-12 — Present
Stripe
Led migration from monolithic to microservices using Gin, improving system scalability by 68%
Implemented caching layer with TDD, reducing database load by 19%
Implemented caching layer with TDD, reducing database load by 59%

Software Engineer 2020-03 — 2023-06
Airbnb
Implemented caching layer with Redis, reducing database load by 26%
Built automated CI/CD pipelines with ASP.NET, reducing deployment time by 54%
Architected and built RESTful APIs serving 500+ requests/day using ASP.NET, reducing response time by 23%
Designed and implemented message queue system using Anthropic, processing 1000+ messages/hour

Education

B.Tech. in Electrical Engineering 2018
Columbia University

B.Tech. in Data Science 2019
Imperial College London

Projects

Data Sync Platform
Implemented File Processing Service using LangChain, achieving 99.9% uptime and handling 50k+ requests daily

GraphQL Server
Created GraphQL Server leveraging Ruby for core functionality and LangChain for optimization

Message Queue System
Built Payment Processing System using Node.js and LangChain, enabling automated processing and improving efficiency by 40%
