Who I Am

Experienced software engineer with expertise in Ruby, Node.js, and Actix. Proven ability to lead technical initiatives and mentor junior team members.

My Journey

AI Engineer @ Salesforce
2023-11 → Present
Architected and built RESTful APIs serving 50000+ requests/day using PlanetScale, reducing response time by 20%
Reduced infrastructure costs by 22% through optimization using LangChain
Built automated CI/CD pipelines with LangChain, reducing deployment time by 60%

Where I Studied

M.Sc., Data Science
Columbia University (2024)

What I Work With

RubyNode.jsActixLlamaIndexNestJSGinMongoDBRedisPlanetScaleElasticsearchHelmJenkinsAnsibleGitHub ActionsKubernetesRenderAWSGoogle GeminiOpenAI APIAWS BedrockRAG ArchitectureTDDREST API Design

Things I've Built

Message Queue System
Created gRPC Services leveraging Ruby for core functionality and LlamaIndex for optimization

REST API Framework
Implemented Cache Layer using LlamaIndex, achieving 99.9% uptime and handling 50k+ requests daily

Notification Service
Designed and implemented gRPC Services with Ruby, integrating with NestJS for seamless data flow

Payment Processing System
Designed Auth Service leveraging LlamaIndex microservices architecture with NestJS for caching

File Processing Service
Developed File Processing Service using Gin, reducing processing time by 60% through algorithmic improvements

Beyond Work

Personal_statement: Passionate about AI ethics and building technology that makes a difference.
