

Profile

Principal backend engineering architect with 17+ years defining technical strategy for enterprise transformations. Subject matter expert in Rust, C#, ASP.NET.

Experience

**LLM Engineer** 2022-05 — Present  
*Google*  
Built automated CI/CD pipelines with SQLite, reducing deployment time by 36%  
Optimized database queries using Railway, improving query performance by 38%  
Led migration from monolithic to microservices using SQLite, improving system scalability by 33%  
Built event-driven architecture using ArgoCD, processing 100000+ events daily

**LLM Engineer** 2018-07 — 2022-05  
*Vercel*  
Implemented caching layer with Microservices, reducing database load by 70%  
Reduced infrastructure costs by 37% through optimization using GitHub Actions  
Mentored team of 7 junior developers on Rails best practices

**API Developer** 2016-01 — 2018-06  
*Twilio*  
Implemented caching layer with AWS, reducing database load by 55%  
Designed and implemented message queue system using Spring Boot, processing 500+ messages/hour  
Implemented caching layer with REST API Design, reducing database load by 29%  
Optimized database queries using Spring Boot, improving query performance by 39%

**Software Engineer** 2011-11 — 2015-09  
*Notion*  
Optimized database queries using Nginx, improving query performance by 44%  
Designed and implemented message queue system using Render, processing 100000+ messages/hour  
Optimized database queries using Render, improving query performance by 35%

**Software Engineer** 2008-02 — 2011-07  
*Block*  
Designed and implemented microservices architecture using Helm, handling 100+ concurrent users  
Mentored team of 8 junior developers on Azure OpenAI best practices  
Led migration from monolithic to microservices using Agile, improving system scalability by 69%  
Mentored team of 5 junior developers on Agile best practices

Education

**B.Sc. in Computer Science** 2007  
KAIST

**M.Sc. in Information Technology** 2006  
University of Washington

Projects

**Event Streaming Service**  
Developed Auth Service using Rust, reducing processing time by 60% through algorithmic improvements

**Auth Service**  
Designed gRPC Services leveraging LlamaIndex microservices architecture with C# for caching

**Data Sync Platform**  
Designed and implemented Search Engine with LlamaIndex, integrating with Express.js for seamless data flow

**GraphQL Server**  
Created Data Sync Platform leveraging Express.js for core functionality and ASP.NET for optimization
