SUMMARY

Principal backend engineering architect with 13+ years defining technical strategy for enterprise transformations. Subject matter expert in C#, TypeScript, Spring Boot.

WORK EXPERIENCE

Platform Engineer 2023-04 — Present

Figma (full-time)

Mentored team of 8 junior developers on Terraform best practices
Built automated CI/CD pipelines with Vercel, reducing deployment time by 36%

API Developer 2021-02 — 2022-10

Salesforce (full-time)

Reduced infrastructure costs by 30% through optimization using CockroachDB
Mentored team of 3 junior developers on Render best practices
Reduced infrastructure costs by 31% through optimization using CockroachDB
Led migration from monolithic to microservices using Render, improving system scalability by 39%

Server-Side Developer 2018-04 — 2020-08

Datadog (freelance)

Built automated CI/CD pipelines with Supabase, reducing deployment time by 41%
Led migration from monolithic to microservices using LLM Integration, improving system scalability by 60%
Designed and implemented microservices architecture using RabbitMQ, handling 5000+ concurrent users
Designed and implemented microservices architecture using Render, handling 50000+ concurrent users

LLM Engineer 2013-07 — 2017-10

OpenAI (full-time)

Reduced infrastructure costs by 49% through optimization using LLM Integration
Built automated CI/CD pipelines with PHP, reducing deployment time by 54%

Server-Side Developer 2011-01 — 2013-06

ParseLab (part-time)

Led migration from monolithic to microservices using Claude API, improving system scalability by 26%
Led migration from monolithic to microservices using Claude API, improving system scalability by 21%
Built automated CI/CD pipelines with Hugging Face, reducing deployment time by 68%
Led migration from monolithic to microservices using Hugging Face, improving system scalability by 61%

EDUCATION

B.Sc. in Electrical Engineering 2011

UC Berkeley — GPA: 3.12

M.Sc. in Software Engineering 2011

UC Berkeley

SKILLS

C#, TypeScript, Spring Boot, Django, MySQL, PostgreSQL, Redis, Docker, gRPC, Git, ArgoCD, Vercel, Fly.io, OpenAI API, AWS Bedrock, Anthropic, Google Gemini, GraphQL, Scrum, Agile

PROJECTS

User Management API *(TypeScript, Spring Boot, C#)*

Built Payment Processing System using Spring Boot and C#, enabling automated processing and improving efficiency by 40%

Notification Service *(Django, TypeScript, C#)*

Built Notification Service using C# and Django, enabling automated processing and improving efficiency by 40%

API Gateway *(C#, TypeScript, Spring Boot)*

Designed and implemented Message Queue System with TypeScript, integrating with C# for seamless data flow

Data Sync Platform *(Django, Spring Boot, TypeScript)*

Developed Auth Service using Django, reducing processing time by 60% through algorithmic improvements

ADDITIONAL

Spoken_language: Spanish (Professional)

Spoken_language: Arabic (Native)

Personal_statement: Passionate about open source and building technology that makes a difference.
