

Cynthia Fuller

Backend Engineering | 5.5 years

About Me

Technical leader in backend engineering with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Python, Ruby, Flask.

Career History

Platform Engineer — Cloudflare

2023-02 to Present

Designed and implemented message queue system using Google Gemini, processing 100000+ messages/hour

Designed and implemented message queue system using NestJS, processing 50000+ messages/hour

Reduced infrastructure costs by 48% through optimization using Git

API Developer — ModelShip

2020-06 to 2022-09

Built automated CI/CD pipelines with Fly.io, reducing deployment time by 26%

Built event-driven architecture using Fly.io, processing 100+ events daily

Built automated CI/CD pipelines with Neon, reducing deployment time by 22%

Academic Background

M.Eng., Data Science — Technion (2018)

Expertise

Python · Ruby · Flask · NestJS · FastAPI · Spring Boot · LlamaIndex · PlanetScale · MySQL · Terraform · Helm · GitHub Actions · gRPC · Heroku · Fly.io · Google Gemini · Hugging Face · RAG Architecture · REST API Design

Side Projects

API Gateway — Designed Event Streaming Service leveraging Flask microservices architecture with FastAPI for caching

Message Queue System — Built REST API Framework using Python and Spring Boot, enabling automated processing and improving efficiency by 40%

Search Engine — Created Database Proxy leveraging Spring Boot for core functionality and LlamaIndex for optimization

Notification Service — Designed and implemented Message Queue System with NestJS, integrating with FastAPI for seamless data flow

Interests & Other

"Compare with speak detail read actually score thank long exist" — ICML 2023
