About Me

Results-driven backend engineering professional with 4 years of experience designing and implementing scalable solutions using Go, Kotlin, PHP. Track record of delivering high-impact projects.

Experience

LLM Engineer @ PipelineIO

2024-10 → Present

- Reduced infrastructure costs by 54% through optimization using gRPC
- Designed and implemented microservices architecture using Node.js, handling 100000+ concurrent users
- Optimized database queries using gRPC, improving query performance by 42%
- Implemented caching layer with Git, reducing database load by 52%

Server-Side Developer @ Snowflake

2023-10 → 2024-08

- Led migration from monolithic to microservices using LlamaIndex, improving system scalability by 48%
- Implemented caching layer with Go, reducing database load by 34%
- Developed real-time data processing pipeline using LlamaIndex, handling 500+ messages/second
- Reduced infrastructure costs by 45% through optimization using Event-Driven Architecture

Platform Engineer @ TechFlow AI

2021-03 → 2023-04

- Designed and implemented microservices architecture using Azure, handling 50000+ concurrent users
- Created authentication and authorization system using Nginx, securing 10000+ user accounts

Education

M.Sc., Cybersecurity

University of Melbourne (2021)

B.Eng., Electrical Engineering

TU Munich (2021)

Tech Stack

- Go
- Kotlin
- PHP
- TypeScript
- Java
- Gin
- FastAPI
- PostgreSQL
- MongoDB
- PlanetScale
- Supabase
- Jenkins
- Nginx
- Terraform
- Cloudflare
- Railway
- AWS Bedrock
- OpenAI API
- Event-Driven Architecture
- Scrum
- GraphQL
- LLM Integration

Projects

Database Proxy

Built File Processing Service with Kotlin and TypeScript, serving 10,000+ daily active users

REST API Framework

Designed and implemented Event Streaming Service with Kotlin, integrating with Gin for seamless data flow

User Management API

Implemented File Processing Service using Java, achieving 99.9% uptime and handling 50k+ requests daily

Notification Service

Designed API Gateway leveraging Gin microservices architecture with Go for caching
