

Jenna Ryan

Data Science / ML / AI | 7.3 years

About Me

Senior data science / ml / ai engineer with 7 years of experience architecting and delivering enterprise solutions. Expert in R, Julia, Go with demonstrated leadership in cross-functional teams.

Career History

AI Product Engineer — Uber

2025-05 to Present

Implemented NLP solution using LightGBM, processing 50000+ text documents daily
Created recommendation system using Prompt Engineering, increasing user engagement by 62%
Created recommendation system using Prompt Engineering, increasing user engagement by 27%
Established MLOps practices using LLM Evaluation, reducing model deployment time by 21%

LLM Engineer — Google

2022-07 to 2025-05

Implemented A/B testing framework using NLP, running 100+ experiments
Built real-time analytics dashboard using Scikit-learn, used by 1000+ stakeholders

AI Product Engineer — ModelShip

2021-05 to 2022-07

Created recommendation system using JAX, increasing user engagement by 54%
Created feature engineering pipeline using JAX, reducing preprocessing time by 69%
Implemented A/B testing framework using Fine-tuning, running 100+ experiments

AI Product Engineer — Salesforce

2018-12 to 2021-04

Built ML model serving infrastructure using Snowflake, handling 100+ predictions/day
Implemented NLP solution using NLP, processing 10000+ text documents daily
Implemented NLP solution using Claude API, processing 100+ text documents daily
Developed computer vision models using NLP, achieving 26% accuracy

Academic Background

M.Tech., Data Science — Georgia Tech (2019)

Expertise

R · Julia · Go · Python · MATLAB · Hugging Face · LightGBM · LlamaIndex · OpenAI API · LangChain · Dask · DVC · Kubeflow · Neptune · Weights & Biases · Snowflake · MongoDB · Redshift · AWS SageMaker · Bedrock · MLOps · Vector Databases · Deep Learning · LLM Evaluation

Side Projects

Data Quality Monitor — Built Predictive Analytics Platform with Go and MATLAB, serving 10,000+ daily active users

NLP Text Analyzer — Designed and implemented Data Warehouse with Python, integrating with R for seamless data flow

Predictive Analytics Platform — Created MLOps Platform leveraging MATLAB for core functionality and Go for optimization

Computer Vision System — Implemented Data Quality Monitor using Go, achieving 99.9% uptime and handling 50k+ requests daily

Interests & Other

Outstanding Contributor — MLH 2022

Volunteer coding instructor at Bowman-Murray Youth Program, 2022-Present

Passionate about accessibility and building technology that makes a difference.
