

# KARI SANCHEZ

kari.sanchez@protonmail.com · 6355020483 · Caseytown, France  
<https://github.com/karisanchez> · <https://linkedin.com/in/kari-sanchez>

## RESEARCH INTERESTS

---

Technical leader in data science / ml / ai with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Python, MATLAB, LlamaIndex.

## EDUCATION

---

|                                                      |      |
|------------------------------------------------------|------|
| <b>ETH Zurich</b><br>B.Sc. in Mathematics, GPA: 3.80 | 2017 |
| <b>TU Delft</b><br>B.Sc. in Data Science, GPA: 3.35  | 2019 |

## PROFESSIONAL EXPERIENCE

---

|                                                                                                                                                                                                                                                                                                         |           |                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|-------------------|
| <b>Data Analyst</b><br>Built real-time analytics dashboard using LLM Evaluation, used by 100+ stakeholders<br>Built ML model serving infrastructure using Statistical Modeling, handling 50000+ predictions/day<br>Implemented NLP solution using DVC, processing 100+ text documents daily             | , Figma   | 2023-09 – Present |
| <b>Data Analyst</b><br>Designed data warehousing solution using Dagster, enabling analytics on 5000+ records<br>Established MLOps practices using Dagster, reducing model deployment time by 70%<br>Implemented NLP solution using MongoDB, processing 1000+ text documents daily                       | , Tesla   | 2022-10 – 2023-05 |
| <b>LLM Engineer</b><br>Created recommendation system using A/B Testing, increasing user engagement by 56%<br>Built end-to-end ML pipeline using Hugging Face Endpoints, processing 100000+ samples daily<br>Built end-to-end ML pipeline using Hugging Face Endpoints, processing 100000+ samples daily | , Netflix | 2018-10 – 2022-05 |

## TECHNICAL PROFICIENCIES

---

Python, MATLAB, LlamaIndex, LangChain, TensorFlow, Keras, Scikit-learn, Dask, MLflow, Databricks, Qdrant, Snowflake, BigQuery, MongoDB, AWS SageMaker, Databricks, NLP, Computer Vision, Fine-tuning, A/B Testing

## SELECTED PROJECTS

---

**Anomaly Detection System** [Python, MATLAB, LLM Evaluation] — Designed Recommendation Engine leveraging Python microservices architecture with LLM Evaluation for caching

**BI Dashboard** [Python, MATLAB, A/B Testing] — Created Predictive Analytics Platform leveraging Python for core functionality and MATLAB for optimization

**ML Model Training Pipeline** [Python, MATLAB, MongoDB] — Designed and implemented NLP Text Analyzer with MongoDB, integrating with Python for seamless data flow

**Computer Vision System** [Python, MATLAB, LLM Evaluation] — Developed Data Quality Monitor using MATLAB, reducing processing time by 60% through algorithmic improvements

## PUBLICATIONS & OTHER

---

Competitive programming
