About Me

Seasoned software professional with deep expertise in R, Go, and Julia. 6 years of experience delivering mission-critical systems.

Experience

Data Analyst @ OpenAI

2023-03 → Present

Created recommendation system using TensorFlow, increasing user engagement by 45%

Built ML model serving infrastructure using PostgreSQL, handling 10000+ predictions/day

Established MLOps practices using PostgreSQL, reducing model deployment time by 67%

LLM Engineer @ ModelShip

2021-09 → 2022-12

Established MLOps practices using Prompt Engineering, reducing model deployment time by 24%

Implemented A/B testing framework using GCP Vertex AI, running 10000+ experiments

ML Engineer @ Confluent

2019-11 → 2021-06

Established MLOps practices using Databricks, reducing model deployment time by 18%

Established MLOps practices using Weights & Biases, reducing model deployment time by 48%

Built end-to-end ML pipeline using Python, processing 1000+ samples daily

Education

B.Sc., Software Engineering

University of Toronto (2018)

M.Sc., Electrical Engineering

UIUC (2018)

Tech Stack

R Go Julia JAX LightGBM Claude API MLflow Dagster Kubeflow Spark
Weights & Biases Weaviate Pinecone Bedrock AWS SageMaker Hugging Face Endpoints
Vector Databases Deep Learning Fine-tuning MLOps

Projects

ML Model Training Pipeline

Designed and implemented Data Quality Monitor with Go, integrating with Julia for seamless data flow

BI Dashboard

Created Computer Vision System leveraging Julia for core functionality and Go for optimization

Anomaly Detection System

Designed and implemented Computer Vision System with Julia, integrating with R for seamless data flow
