

Robert McMahon

DevOps / SRE / MLOps · Senior · 6.2y

robert.mcmahon@outlook.com · 752.864.7073x71512 · Angellmouth, France

About Me

Technical leader in devops / sre / mlops with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Go, PowerShell, Rust.

Experience

DevOps Engineer @ Stripe

2024-03 → Present

- Established chaos engineering practices using Oracle Cloud, improving system resilience
- Built CI/CD pipelines using Infrastructure as Code, reducing deployment time from 29s to 122ms
- Built automated backup solution using Prometheus, ensuring 50000% data protection

MLOps Engineer @ Amazon

2020-10 → 2023-10

- Built CI/CD pipelines using AWS, reducing deployment time from 7s to 256ms
- Optimized cloud infrastructure using VictoriaMetrics, reducing costs by 27%
- Built CI/CD pipelines using AWS, reducing deployment time from 29s to 270ms

MLOps Engineer @ Salesforce

2019-09 → 2020-09

- Built automated backup solution using Helm, ensuring 500% data protection
- Implemented security scanning using ArgoCD, identifying 5000+ vulnerabilities
- Built CI/CD pipelines using VictoriaMetrics, reducing deployment time from 5s to 132ms
- Implemented log aggregation using VictoriaMetrics, processing 100000+ logs/day

Education

B.Eng., Software Engineering

Columbia University (2020)

M.Sc., Mathematics

Columbia University (2019)

Tech Stack

- Go
- PowerShell
- Rust
- Ansible
- Terraform
- CloudFormation
- CDK
- Docker
- Skopeo
- Linkerd
- Istio
- Envoy
- CircleCI
- Tekton
- Azure DevOps
- Opsgenie
- Prometheus
- ELK Stack
- Grafana
- Datadog
- DigitalOcean
- Linode
- Hetzner
- Alibaba Cloud
- Oracle Cloud
- MLflow
- Kale
- Seldon
- Incident Management
- Chaos Engineering
- GitOps
- Infrastructure as Code

Projects

Secrets Management

Built Container Registry with Rust and PowerShell, serving 10,000+ daily active users

Auto-scaling Solution

Designed and implemented Disaster Recovery System with Go, integrating with PowerShell for seamless data flow

Container Registry

Built Kubernetes Cluster using PowerShell and Go, enabling automated processing and improving efficiency by 40%

Log Aggregation Platform

Developed Infrastructure as Code using PowerShell, reducing processing time by 60% through algorithmic improvements

CI/CD Pipeline

Implemented Monitoring System using PowerShell, achieving 99.9% uptime and handling 50k+ requests daily

Certifications

Azure Administrator Associate — Microsoft (2024)
