

Victoria Ayers

DevOps / SRE / MLOps | 4.2 years

About Me

Experienced software engineer with expertise in Rust, Python, and Go. Proven ability to lead technical initiatives and mentor junior team members.

Career History

Infrastructure Engineer — Block

2022-02 to Present

Optimized cloud infrastructure using Podman, reducing costs by 56%

Built disaster recovery solution using Kubeflow, achieving RTO of 191ms

Built automated backup solution using DigitalOcean, ensuring 500% data protection

Academic Background

M.Eng., Cybersecurity — TU Delft (2022)

Expertise

Rust · Python · Go · Crossplane · Terraform · K3s · Linkerd · Skopeo · Azure DevOps · GitHub Actions · GitLab CI · Jenkins · Tekton · Grafana · Thanos · VictoriaMetrics · Datadog · Hetzner · Alibaba Cloud · AWS · Azure · GCP · Triton Inference Server · Seldon · Kale · GitOps · Platform Engineering

Side Projects

Container Registry — Designed Infrastructure as Code leveraging Rust microservices architecture with Go for caching

Monitoring System — Built Monitoring System with Rust and Go, serving 10,000+ daily active users

Observability Dashboard — Built CI/CD Pipeline with Go and Python, serving 10,000+ daily active users

Kubernetes Cluster — Implemented CI/CD Pipeline using Go, achieving 99.9% uptime and handling 50k+ requests daily

GitOps Workflow — Developed Observability Dashboard using Rust, reducing processing time by 60% through algorithmic improvements

Interests & Other

Employee of the Quarter — Company Internal 2020

Best Paper Award — IEEE 2025

Passionate about accessibility and building technology that makes a difference.
