SUMMARY

Principal full-stack engineering architect with 15+ years defining technical strategy for enterprise transformations. Subject matter expert in JavaScript, Node.js, C#.

WORK EXPERIENCE

Web Developer

2022-09 — Present

Shopify (internship)

Designed RESTful API and frontend using Angular, handling 5000+ concurrent sessions
Mentored team of 4 developers on Python full-stack best practices
Architected full-stack solution with Netlify, improving response time by 43%
Designed RESTful API and frontend using Agile, handling 50000+ concurrent sessions

Full-Stack Developer

2017-12 — 2022-05

Vercel (full-time)

Architected full-stack solution with GCP, improving response time by 28%
Built end-to-end web application using GCP, serving 500+ daily active users
Designed RESTful API and frontend using TypeScript, handling 100000+ concurrent sessions

Application Developer

2013-04 — 2017-09

Microsoft (contract)

Implemented CI/CD pipeline for full-stack app using JavaScript, achieving 100000+ deploys/week
Implemented server-side rendering using Cloudflare, reducing page load time by 24%

Application Developer

2012-09 — 2013-04

Shopify (contract)

Created cross-platform application using Angular, reducing development time by 53%
Architected full-stack solution with Netlify, improving response time by 34%

Full-Stack Developer

2010-05 — 2012-06

Tesla (full-time)

Created cross-platform application using Redis, reducing development time by 56%
Optimized database queries and frontend rendering using Azure, improving UX by 26%
Created cross-platform application using SQLite, reducing development time by 56%

EDUCATION

B.Sc. in Information Technology

2011

University of Michigan

SKILLS

JavaScript, Node.js, C#, Angular, Flask, PostgreSQL, Firebase, SQLite, Supabase, Cypress, Webpack, Storybook, Kubernetes, Vite, Heroku, AWS, Render, Cloudflare, REST API Design, TDD, Agile, CI/CD

PROJECTS

Notification Hub (*Flask, Angular, Node.js*)

Built Analytics Dashboard with Node.js and Angular, serving 10,000+ daily active users

Blog Platform (*JavaScript, C#, Node.js*)

Designed Content Management System leveraging JavaScript microservices architecture with Node.js for caching

Project Tracker (*Node.js, Flask, C#*)

Developed Booking System using Node.js, reducing processing time by 60% through algorithmic improvements

User Management Portal (*JavaScript, C#, Angular*)

Built Search Application with Angular and JavaScript, serving 10,000+ daily active users

E-commerce Platform (*Angular, Node.js, C#*)

Built Project Tracker using Node.js and C#, enabling automated processing and improving efficiency by 40%

ADDITIONAL

Personal_statement: Passionate about mentoring junior engineers and building technology that makes a difference.
