

Profile

Senior technical leader specializing in full-stack engineering with expertise in C#, TypeScript, Node.js. Proven success in technical vision, team development, and stakeholder management.

Experience

Application Developer 2024-11 — Present
Spotify

Architected full-stack solution with Render, improving response time by 27%
Led full-stack migration from monolith to REST API Design, reducing latency by 16%
Mentored team of 2 developers on PostgreSQL full-stack best practices
Designed RESTful API and frontend using REST API Design, handling 5000+ concurrent sessions

Application Developer 2021-04 — 2024-06
Anthropic

Optimized database queries and frontend rendering using TypeScript, improving UX by 43%
Mentored team of 2 developers on TypeScript full-stack best practices
Optimized database queries and frontend rendering using GitHub Actions, improving UX by 67%

Application Developer 2016-11 — 2020-11
Stripe

Built end-to-end web application using GCP, serving 5000+ daily active users
Mentored team of 4 developers on Vercel full-stack best practices
Optimized database queries and frontend rendering using GCP, improving UX by 67%
Architected full-stack solution with GCP, improving response time by 57%

Education

B.Sc. in Software Engineering 2017
EPFL

Projects

Task Management App
Designed Blog Platform leveraging Java microservices architecture with Angular for caching

User Management Portal
Created User Management Portal leveraging C# for core functionality and Django for optimization

Content Management System
Built Notification Hub using Node.js and Java, enabling automated processing and improving efficiency by 40%

Booking System
Built Analytics Dashboard with Angular and TypeScript, serving 10,000+ daily active users

Notification Hub
Developed Search Application using C#, reducing processing time by 60% through algorithmic improvements
