Platform Engineer
- 2012-01 — 2015-07
Application Developer

Summary

Principal full-stack engineering architect with 13+ years defining technical strategy for enterprise transformations. Subject matter expert in TypeScript, C#, Go.

Experience

Application Developer at Confluent

2023-07 – Present

Created cross-platform application using Express.js, reducing development time by 31%
Created cross-platform application using Azure, reducing development time by 36%

Platform Engineer at Shopify

2020-04 – 2023-04

Created cross-platform application using GCP, reducing development time by 32%
Designed RESTful API and frontend using SQLite, handling 500+ concurrent sessions
Led full-stack migration from legacy system to CI/CD, reducing latency by 22%
Implemented server-side rendering using Firebase, reducing page load time by 58%

Platform Engineer at Anthropic

2015-07 – 2020-01

Designed RESTful API and frontend using Agile, handling 10000+ concurrent sessions
Mentored team of 4 developers on Microservices full-stack best practices
Mentored team of 5 developers on React full-stack best practices

Application Developer at Microsoft

2012-01 – 2015-07

Built real-time notification system using SQLite, processing 5000+ events/day
Implemented CI/CD pipeline for full-stack app using MongoDB, achieving 500+ deploys/week

Education

Ph.D. in Cybersecurity — Tsinghua University (2010)

Skills

TypeScript, C#, Go, Java, Python, FastAPI, Django, Firebase, MySQL, Vite, Cypress, Git, Vercel, Netlify, Cloudflare, AWS, Responsive Design, CI/CD, Agile, REST API Design, Progressive Web Apps

Projects

Real-time Chat App

Created Blog Platform leveraging TypeScript for core functionality and C# for optimization

Content Management System

Implemented Social Dashboard using FastAPI, achieving 99.9% uptime and handling 50k+ requests daily

E-commerce Platform

Built Content Management System with C# and TypeScript, serving 10,000+ daily active users

Blog Platform

Created Blog Platform leveraging Django for core functionality and FastAPI for optimization

Project Tracker

Created Blog Platform leveraging FastAPI for core functionality and C# for optimization
