ABOUT

Senior full-stack engineering engineer with 6 years of experience architecting and delivering enterprise solutions. Expert in C#, TypeScript, Next.js with demonstrated leadership in cross-functional teams.

BACKGROUND

Software Engineer, Notion (2025-03–Present)

Implemented CI/CD pipeline for full-stack app using Vercel, achieving 50000+ deploys/week

Built real-time notification system using Vercel, processing 500+ events/day

Led full-stack migration from legacy system to Vercel, reducing latency by 22%

Implemented server-side rendering using Agile, reducing page load time by 30%

Full-Stack Developer, DataPulse (2023-08–2024-10)

Built end-to-end web application using REST API Design, serving 100000+ daily active users

Architected full-stack solution with GCP, improving response time by 32%

Platform Engineer, OpenAI (2019-08–2023-08)

Built end-to-end web application using Heroku, serving 100+ daily active users

Implemented server-side rendering using FastAPI, reducing page load time by 49%

Implemented CI/CD pipeline for full-stack app using Netlify, achieving 1000+ deploys/week

ACADEMICS

B.A. in Information Technology — University of Toronto, 2019

TOOLKIT

C# / TypeScript / Next.js / Flask / Django / SQLite / MySQL / Vite / Jest / Git / GitHub
Actions / Heroku / Render / GCP / AWS / Responsive Design / Scrum / REST API Design /
Microservices / Agile

CREDENTIALS

Certified Kubernetes Administrator (CNCF)

Google Cloud Professional Cloud Developer (Google)
