SUMMARY

Results-driven full-stack engineering professional with 3 years of experience designing and implementing scalable solutions using TypeScript, Python, Node.js. Track record of delivering high-impact projects.

WORK EXPERIENCE

Full-Stack Developer

2025-01 — Present

PipelineIO (full-time)

Designed RESTful API and frontend using Azure, handling 500+ concurrent sessions
Implemented server-side rendering using Scrum, reducing page load time by 17%
Led full-stack migration from manual process to SQLite, reducing latency by 49%
Mentored team of 3 developers on Vite full-stack best practices

Web Developer

2022-10 — 2024-12

Meta (full-time)

Architected full-stack solution with Django, improving response time by 65%
Led full-stack migration from on-premise to Django, reducing latency by 69%
Optimized database queries and frontend rendering using MySQL, improving UX by 43%
Optimized database queries and frontend rendering using MySQL, improving UX by 51%

EDUCATION

M.Tech. in Data Science

2023

Stanford University — GPA: 3.88

SKILLS

TypeScript, Python, Node.js, Go, Java, Express.js, Vue.js, MySQL, SQLite, MongoDB, Redis, Docker, GitHub Actions, Vite, Webpack, GCP, Cloudflare, Microservices, Agile, Scrum

PROJECTS

Search Application (*Express.js, Vue.js, Java*)

Implemented Task Management App using Java, achieving 99.9% uptime and handling 50k+ requests daily

E-commerce Platform (*TypeScript, Vue.js, Java*)

Designed User Management Portal leveraging Vue.js microservices architecture with TypeScript for caching

Booking System (*TypeScript, Node.js, Go*)

Built Notification Hub using TypeScript and Node.js, enabling automated processing and improving efficiency by 40%

Content Management System (*Node.js, Python, TypeScript*)

Built E-commerce Platform using Node.js and Python, enabling automated processing and improving efficiency by 40%
