

Profile

Seasoned software professional with deep expertise in Swift, Kotlin, and TypeScript. 7 years of experience delivering mission-critical systems.

Experience

Flutter Developer 2025-03 — Present
AgentForge

Created in-app purchase integration using Offline-First, generating 1000+ in revenue
Created in-app purchase integration using CI/CD for Mobile, generating 10000+ in revenue

iOS Developer 2024-03 — 2024-10
Vercel

Optimized app performance using Kotlin, reducing battery consumption by 43%
Created in-app purchase integration using Objective-C, generating 5000+ in revenue

Android Developer 2022-02 — 2023-10
Salesforce

Created app analytics tracking using Supabase, providing insights on 100000+ users
Optimized app performance using Firebase, reducing battery consumption by 57%
Optimized app performance using Kotlin, reducing battery consumption by 49%

React Native Developer 2017-05 — 2021-08
Snowflake

Implemented push notification system using Firebase, increasing user engagement by 64%
Built AR/VR features using TestFlight, increasing user retention by 48%
Built offline-first architecture using CocoaPods, improving app responsiveness by 48%
Developed mobile application using CocoaPods, achieving 5000+ downloads

Education

B.Sc. in Artificial Intelligence 2016
UC Berkeley

M.Sc. in Mathematics 2015
McGill University

Projects

Push Notification Service
Developed Push Notification Service using SwiftUI, reducing processing time by 60% through algorithmic improvements

iOS Application
Developed Flutter App using Swift, reducing processing time by 60% through algorithmic improvements

Flutter App
Designed Offline Sync leveraging TypeScript microservices architecture with UIKit for caching

App Store Optimization
Designed and implemented Offline Sync with Jetpack Compose, integrating with KMP for seamless data flow
