About Me

Results-driven mobile development professional with 3 years of experience designing and implementing scalable solutions using C++, TypeScript, Dart. Track record of delivering high-impact projects.

Experience

React Native Developer @ Confluent

2023-02 → Present

- Developed cross-platform solution using CI/CD for Mobile, reducing development time by 65%
- Created in-app purchase integration using CI/CD for Mobile, generating 500+ in revenue
- Built widget functionality using Firebase, increasing daily active users by 39%
- Optimized app performance using TestFlight, reducing battery consumption by 16%

React Native Developer @ Airbnb

2022-05 → 2023-01

- Implemented push notification system using KMP, increasing user engagement by 64%
- Built offline-first architecture using Expo, improving app responsiveness by 34%

Education

B.Tech., Computer Science

UT Austin (2023)

B.Tech., Electrical Engineering

UIUC (2021)

Tech Stack

- C++
- TypeScript
- Dart
- Swift
- Kotlin
- SwiftUI
- KMP
- Flutter
- Jetpack Compose
- App Center
- Xcode
- CocoaPods
- Fastlane
- Android Studio
- Firebase Firestore
- SQLite
- Realm
- Hive
- Firebase
- RevenueCat
- Supabase
- AWS Amplify
- Offline-First
- CI/CD for Mobile
- Clean Architecture
- MVVM
- App Store Optimization

Projects

Offline Sync

Created App Analytics leveraging Kotlin for core functionality and KMP for optimization

React Native App

Developed App Analytics using Flutter, reducing processing time by 60% through algorithmic improvements

Push Notification Service

Implemented App Store Optimization using KMP, achieving 99.9% uptime and handling 50k+ requests daily

Mobile CI/CD

Built Push Notification Service using Kotlin and TypeScript, enabling automated processing and improving efficiency by 40%

Android Application

Designed and implemented In-app Purchase System with Flutter, integrating with Swift for seamless data flow
