SKILLS

OTHER

French (Conversational)

Profile

Seasoned software professional with deep expertise in Swift, Objective-C, and React Native. 7 years of experience delivering mission-critical systems.

Experience

iOS Developer 2023-06 — Present

Airbnb
Developed cross-platform solution using Firebase, reducing development time by 21%
Built offline-first architecture using Hive, improving app responsiveness by 70%
Optimized app performance using TypeScript, reducing battery consumption by 48%

Android Developer 2021-08 — 2023-03

Airbnb
Implemented biometric authentication using Firebase, securing 1000+ user accounts
Implemented biometric authentication using RevenueCat, securing 10000+ user accounts

Mobile Developer 2018-12 — 2021-06

Vercel
Implemented biometric authentication using CI/CD for Mobile, securing 100000+ user accounts
Created app analytics tracking using CI/CD for Mobile, providing insights on 10000+ users
Built AR/VR features using Android Studio, increasing user retention by 33%

Flutter Developer 2017-12 — 2018-09

Palantir
Implemented biometric authentication using Fastlane, securing 1000+ user accounts
Implemented push notification system using Fastlane, increasing user engagement by 49%

Education

M.Tech. in Data Science 2016

Purdue University

Projects

In-app Purchase System

Designed React Native App leveraging Swift microservices architecture with React Native for caching

iOS Application

Created App Analytics leveraging Swift for core functionality and Flutter for optimization

Mobile Backend API

Designed App Store Optimization leveraging Objective-C microservices architecture with Flutter for caching
