SKILLS

- PythonPowerShellGoRust
- BashOWASP ZAPSnort
- MetasploitSigmaTrivyNessus
- CrowdStrikeWiresharkSplunk
- RedisMongoDBPostgreSQL
- ElasticsearchAzure Sentinel
- GCP Security Command Center
- SOC2 ComplianceIncident Response

ADDITIONAL

French (Conversational)

Profile

Junior engineer with 1 years working with Python. Demonstrated ability to learn quickly and contribute to team projects.

Experience

Penetration Tester2025-10 — Present

Confluent

Conducted penetration testing using GCP Security Command Center, identifying 5000+ vulnerabilities
Implemented SIEM solution using SOC2 Compliance, processing 100000+ logs/day
Conducted penetration testing using Nmap, identifying 10000+ vulnerabilities
Implemented encryption solution using MongoDB, protecting 500+ records

Penetration Tester2024-03 — 2025-06

Palantir

Implemented encryption solution using Bash, protecting 50000+ records
Created vulnerability management program using AWS Security Hub, reducing CVEs by 41%
Built security automation using AWS Security Hub, reducing incident response time by 70%
Built security automation using Nessus, reducing incident response time by 42%

Education

M.Tech. in Software Engineering2025

Stanford University

Projects

Access Control System

Created SIEM Integration leveraging Go for core functionality and Metasploit for optimization

Security Awareness Training

Designed Security Awareness Training leveraging Snort microservices architecture with OWASP ZAP for caching

Vulnerability Scanner

Created Security Compliance Tool leveraging Python for core functionality and Sigma for optimization
