"Feeling lead per interesting yard" — ACM 2020

Profile

Senior cybersecurity engineer with 7 years of experience architecting and delivering enterprise solutions. Expert in Bash, Python, Rust with demonstrated leadership in cross-functional teams.

Experience

- Security Architect**2024-11 — Present
CloudNova
Developed threat intelligence platform using Splunk, tracking 10000+ threats
Conducted penetration testing using Splunk, identifying 1000+ vulnerabilities
Implemented encryption solution using GCP Security Command Center, protecting 50000+ records
- SOC Analyst**2023-04 — 2024-11
Vercel
Created security awareness training using Elasticsearch, reducing phishing clicks by 17%
Built incident response automation using Incident Response, reducing recovery time by 54%
Created vulnerability management program using Elasticsearch, reducing CVEs by 20%
Built incident response automation using PostgreSQL, reducing recovery time by 51%
- Security Engineer**2019-08 — 2022-12
Apple
Implemented security monitoring using Splunk, detecting 100+ threats
Created security awareness training using AWS Security Hub, reducing phishing clicks by 19%
- Security Engineer**2018-06 — 2019-08
Supabase
Implemented identity management using Snort, securing 100+ user identities
Implemented encryption solution using GCP Security Command Center, protecting 500+ records
Implemented identity management using Snort, securing 10000+ user identities
Implemented SIEM solution using OWASP Top 10, processing 50000+ logs/day

Education

- M.Tech. in Software Engineering**2018
UT Austin
- Ph.D. in Mathematics**2016
IIT Bombay

Projects

- Security Dashboard**
Built Incident Response Platform with Go and Metasploit, serving 10,000+ daily active users
- Security Compliance Tool**
Designed and implemented Encryption Utility with Metasploit, integrating with Bash for seamless data flow
- SIEM Integration**
Built Vulnerability Scanner with PowerShell and Burp Suite, serving 10,000+ daily active users
